*“A few things come from Kansa City ...jazz, BBQ and now Attic Light... There's more to this band than energizing fusion of rock-n-roll with funk and more... Sexiness ...it's an art form and very essential when trying to promote your band's stage presence to a new audience. Nathan exceeded the legal limit of sexiness throughout the entire Attic Light set. Within a heartbeat, the temperature just went up a notch or two and it was merely just the first song!”*

SouthSide On The Town –Chicago

**Attic Light** is known for their vigorous and eccentric live performances which have made the band a distinct presence in the Midwest. After the release of their self-produced debut EP, *Different Shades of Black*, the band spent months touring the Midwest, performing and appearing at many prominent venues, regional radio stations, television programs, and publications. Their new record, *The EXILE EP* (featuring the single “Whiskey Love”) is available now at online stores and streaming services.

The Kansas City based band recorded *The EXILE EP*, in Nashville with producer Dohse. “We could not have created something like this if we hadn’t gone to Nashville and worked with the team we did. We immersed ourselves in the process, experimented with new sounds, and I think it comes through in the songs,” says guitarist Michael Pittman.

In collaboration with AGD Entertainment, Attic Light recently finished several weeks of tour dates to support the new record. Attic Light is currently preparing for the release of their upcoming summer single “Hot in Kansas City” after which they will continue touring. So, whether it’s the stimulating fusion of rock and dance or their infectious live energy, brace yourself for the Attic Light frenzy.

*“Nothing compares to the earnest, organic energy that good old rock n’ roll generates...Attic Light stands as a testament to that age old value.”* Andrew Gaug –St Joe Live

*“[The EXILE EP has] four very catchy songs that you will find stuck in your head for days, even weeks, on end...You can listen to the EP over and over for days and notice new details every time...This is a solid second offering from Attic Light that should succeed both with the band's growing fanbase and radio programmers alike”* –Charles Walton, The Examiner

*“Attic Light somehow mixes familiarity with originality creating a song you know you have never heard, but already love...The energy they bring to the stage is not only contagious, but a vigorous, true to the meaning of rock and roll, performance.”* Mara Wilson –The Reader (Omaha)
